EXAMINER'S AMENDMENT

- **THIS EXAMINER'S AMENDMENT IS A SUPPLEMENTAL ALLOWANCE TO THE NOA MAILED ON 11/17/09.**
- **THE NOA was mailed on 11/17/2009. However, the Examiner noted that claim 13 was dependent on cancelled claim 1. The Examiner corrects this by amending claim 13 to depend from independent claim 2.**

1. Authorization for this examiner's amendment was given in a telephone interview with John Mattingly on 01/04/09.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

Please amend the claims, claim 13, as follows:

In line 2, change "...claim 1..." to "...claim 2...".

Allowable Subject Matter

3. Claims 2-13 are allowed. Renumbered claims 1-12 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Regarding claim 2:

The prior art does not teach or suggest:

"An organic EL drive circuit for generating, in response to a predetermined current inputted to an input terminal of a D/A converter circuit constructed with a current mirror circuit, drive currents to be outputted to terminal pins of the organic EL display panel or a current, on which the drive currents are generated, by converting digital display data into analog signal by the D/A converter circuit, comprising: first transistor provided between an input side transistor of the current mirror circuit and the input terminal; a second transistor provided between an output side transistor of the current mirror circuit and an output terminal; and a third transistor provided between the output terminal and a power source line, wherein proof voltages of the input side transistor, the output side transistor and the third transistor are lower than proof voltage of the first and second transistors and; wherein the first transistor and the second transistor are biased such that a connecting point of the input side transistor and the first transistor and a connecting point of the output side transistor and the second transistor become substantially equal potentials."

Regarding claims 3-13:

Claims 3-13 depend on claim 2 and are found allowable for at least the same reason as discussed above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

[Koyama; Jun, US 6777885 B2] discloses: A D/A conversion portion, see Fig.4.

[Jo; Hiroaki, US 7145531 B2] discloses: An electronic circuit, electronic device, electro-optical apparatus, and electronic unit.
